EDUCATION

Cincinnati State Technical and Community College | Cincinnati, OH
Degree in Computer Software Development and Database Management

Graduated: **August 2023**

PROJECTS

Investigation Buddy

- Collaborated with a team of three members to develop a web application for a local township's zoning department.
- Created a feature-rich web application to streamline the zoning department's workflow.
- Utilized Laravel, a PHP web framework, as the primary technology for web application development.

Garmin/Strava Data Analysis

- Gathered data from personal Garmin watch records and the Strava API to access detailed fitness and activity data.
- Created interactive and informative data visualizations using tools like Matplotlib and Seaborn to present key findings effectively.
- Cleaned and prepared raw data for analysis, addressing missing values and inconsistencies.

Snake Game

- Implemented a high score tracking system using SQLite3, allowing players to compete for the top spot.
- Employed Pygame library for graphics and user interface.

WORK EXPERIENCE

Aston Oaks Golf Course | Cincinnati, OH

August 2019 – November 2020

Cart Boy

- Implemented a consistent cleaning schedule to uphold a high standard of cart hygiene, contributing to the overall quality of the golfing experience.
- Communicating with colleagues of different ages groups to help lead a positive work environment.

Oak Leaf Restaurant | Cincinnati, OH

November 2020 – Present

Dishwasher

- Improved my ability to work under pressure by handling peak dining hours and maintaining a consistent workflow to support the restaurant's smooth operation.
- Developed a strong work ethic by consistently arriving on time for shifts, taking on additional responsibilities when needed, and contributing to a positive work environment.

Expeditor

- Collaborated closely with chefs, line cooks, and servers to create a cohesive and efficient workflow, contributing to a smoother restaurant operation.
- Paid close attention to dietary restrictions, special requests, and plating aesthetics, ensuring that each dish met customers' expectations.
